**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 19, 20, 26 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang et al (5981447).

Chang teaches a wellbore fluid which comprises a HEC polymer and an encapsulated calcium peroxide (see column 18, lines 5-35).

3. Claims 1-6, 19, 20, 26-28, 31-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Dawson et al (5624886).

Dawson teaches a wellbore fracturing fluid which comprises a polymer such as a guar, and a calcium, magnesium or zinc peroxide which is at least partially encapsulated by sodium silicate. The pellet comprising the peroxide can also comprise acids such as EDTA, citric acid, boric acid etc, (claim 5) which would lower the pH when formation fluids enter the well after fracturing, and result in the activation of the peroxide therein, to break the polymers. The pH would also be lowered by the dilution of the fluid by the formation fluids.

4. Claims 7-11, 21-25, 29, 30, 41-49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 12-18 are allowable over the art of record.
